

ANKAN RAY

PROJECTS

• Portfolio

My Portfolio Website written using HTML, CSS and JavaScript

It showcases my skills, projects, and education with comprehensive details about my abilities and accomplishments, it also provides my contact information and a link to my resume for a comprehensive overview of my student journey

GitHub: https://github.com/LonelySam16/Portfolio_Website

• Chatting Application

A chatting application that is made using React and Sass with backend support using Firebase

A sophisticated chat application using Firebase for seamless real-time communication using both texts and images. It facilitates user registration and login functionalities, resulting in a visually appealing user interface and an enhanced interactive experience.

GitHub: <https://github.com/LonelySam16/AnkanChat>

• Online Voting Platform

A Web Application written in WAMP stack with frontend in HTML, CSS and JavaScript.

Voters and Candidates can register and log in with their credentials to view their Details and Vote . A Admin panel with histogram of votes distributed among Candidates and also details about Voters who have already voted is displayed.

GitHub: <https://github.com/LonelySam16/OnlineVoting>

• News Webapp

A Web Application that allows to search and view news related to any topic using an API call

GitHub: https://github.com/LonelySam16/News_WepApp

• Chrome Extension

Motivation-Quotes

An extension that displays a motivational quote and its author, on every click.

GitHub: https://github.com/LonelySam16/Motivation-Quotes_ChromeExtension

• Food Ordering App UI

A UI design using Figma for a food delivery app

GitHub: <https://github.com/LonelySam16/Food-Ordering-Desktop-Figma>
